Introduction

Greeting a patient and the phone rings. You have just answered the phone, the doctor asks for something - all at once. And now the clinic has planned to go paperless implementing a new EMR solution. Well, which menu should I click, which screen should I choose? No - You do not have the luxury of downtime or a steep learning curve. Wow, can the life of a medical administrative assistant get more overwhelming than this?

- ✓ Are you the first impression of a doctor's office experience?
- ✓ Do you play an integral role in smooth operations of a healthcare practice?
- ✓ Do you see yourself in a role that requires organization, digital expertise and the ability to prioritize?

The success of a doctor's office requires the hard work of behind-the-scenes multitasking support personnel especially the medical admin who perform a wide variety of support duties. We understand your challenges just as you do and that is why we believe our OpenEMR user friendly guide will make your life easy. This guide intends to provide easy to understand usage instructions to the OpenEMR web user interface (UI) including menus, screens and workflow to improve productivity of Medical Administrative assistants and enhance business outcomes of a healthcare practice.

Introduction to OpenEMR

OpenEMR is a Free and Open Source electronic health records and medical practice management application. It is ONC Certified and it features fully integrated electronic health records, practice management, scheduling, electronic billing, internationalization, free support, a vibrant community, and a whole lot. It can run on Windows, Linux, Mac OS X, and many other platforms.

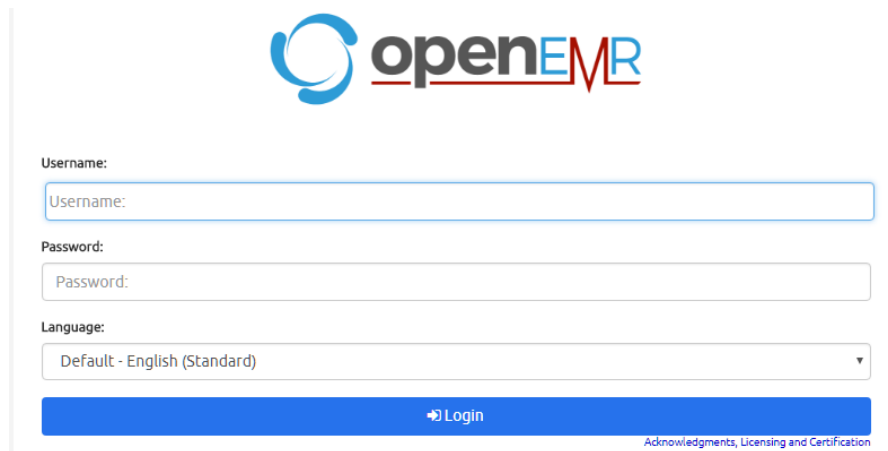

Features

- ✓ Advanced scheduling allows clinics to create repeating events, automated workflows triggered by check-in and patient reminders.
- ✓ E-prescription was entered into an encounter and have it electronically sent to the patient's pharmacy.
- ✓ Export billing data in standardized X12 format.
- ✓ Generate CMS Meaningful Use reports with just a few clicks.
- ✓ Have lab orders automatically sent to a lab and integrate the result into a patient's chart automatically.

- ✓ Navigate complex patient algorithms using the clinical decision rules engine to ensure the highest quality of care for patient.
- ✓ HIPAA-friendly, fine-grained access control objects, and industry-standard password hashing helps to protect your practice from intrusion.
- ✓ Available in over 30 languages and customizable to add more.

Getting Started

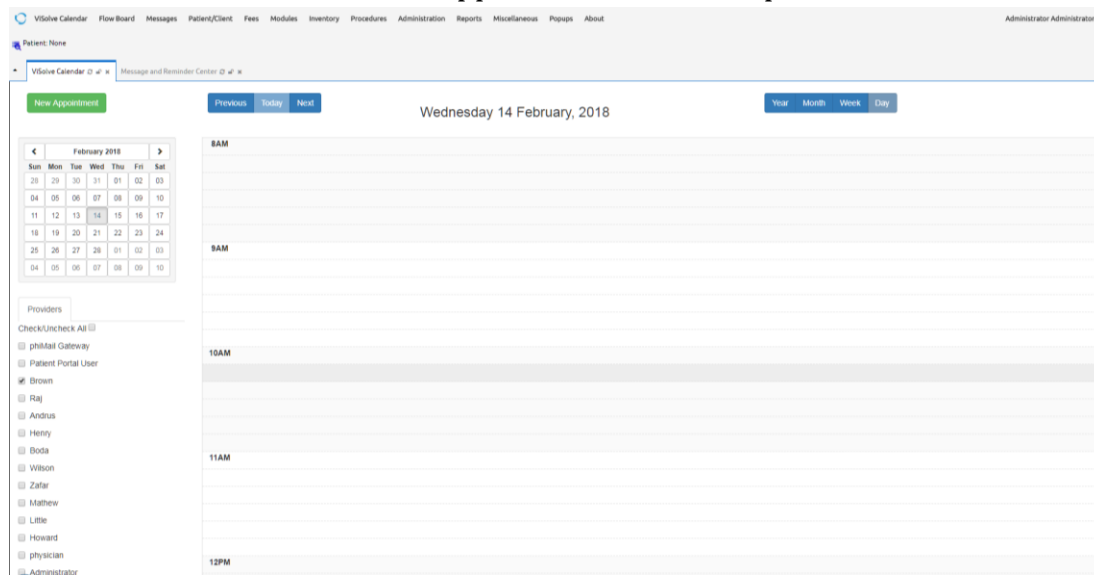

Your healthcare practice has installed OpenEMR version 5.0.0 and you are all set to explore the new world of digital healthcare. In web browser, enter the URL for the OpenEMR access and use your OpenEMR credentials to login as provided by your system administrator.

The image shows the OpenEMR login interface. At the top center is the OpenEMR logo, which consists of a blue circular icon with a white 'C' shape inside, followed by the text 'openEMR' in a sans-serif font, where 'open' is blue and 'EMR' is red. Below the logo are three input fields: 'Username:' with a text box containing 'Username:', 'Password:' with a text box containing 'Password:', and 'Language:' with a dropdown menu showing 'Default - English (Standard)'. Below these fields is a blue 'Login' button with a white right-pointing arrow. At the bottom right, there is a small link that says 'Acknowledgments, Licensing and Certification'.

Figure 1: OpenEMR Login

Logging in OpenEMR as an administrative assistant, takes you to the main landing page. This screen shows the schedules and appointments of all the practitioners at the clinic.

The image shows the OpenEMR calendar view. At the top is a navigation bar with links: 'Vistula Calendar', 'Flow Board', 'Messages', 'Patient/Client', 'Fees', 'Modules', 'Inventory', 'Procedures', 'Administration', 'Reports', 'Miscellaneous', 'Popups', and 'About'. Below this is a header area with 'Patient: None' and 'Message and Reminder Center'. The main content area is titled 'Wednesday 14 February, 2018' and has tabs for 'Previous', 'Today', and 'Next'. On the left, there is a 'New Appointment' button and a calendar for February 2018. Below the calendar is a list of providers with checkboxes: 'phillip Gateway', 'Patient Portal User', 'Brown', 'Raj', 'Andrus', 'Henry', 'Boda', 'Wilson', 'Zafar', 'Matthew', 'Little', 'Howard', 'physician', and 'Administrator'. The main area shows a schedule for the day, with time slots from 8AM to 12PM. The 8AM slot is currently empty.

Figure 2: Calendar View

Scheduling

Setting up Provider Schedules

Is it the first time you started scheduling in OpenEMR? If YES, you will need to set up schedules for all the practitioners.

To do this, select a provider from the 'Providers' list on the left for whom you would like to set up a schedule. Next, click the time at which that provider is scheduled to enter office.

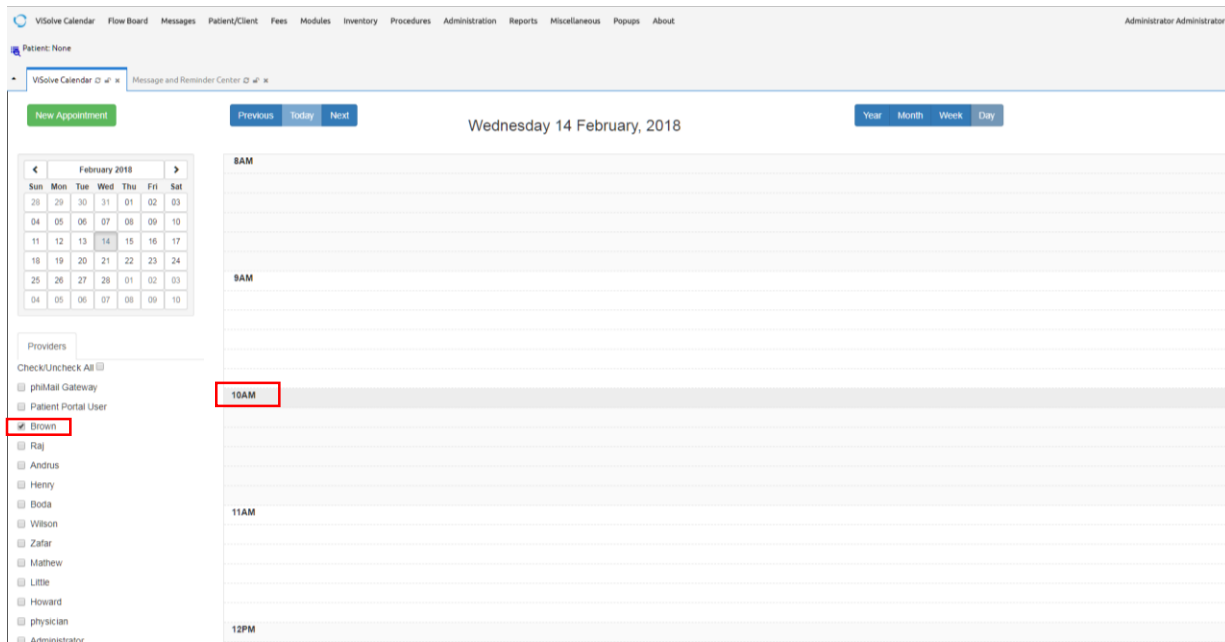

Figure 3: Setting provider scheduler

Clicking on the time in the Calendar page will display an 'Add/Edit Appointment' dialog box. Refer the screen below.

The screenshot shows the 'Add/Edit Appointment' dialog box. It has a 'Patient' tab and a 'Provider' tab. The 'Provider' tab is active, showing a dropdown menu with 'Brown' selected. The 'Category' is set to 'In Office'. The 'Date' is set to '2018-02-14'. The 'Title' is 'In Office'. The 'Facility' is 'Facility one'. The 'Billing Facility' is 'Facility one'. The 'Provider' is 'Brown'. The 'Pre Cat' is empty. The 'Event Details' section has 'All day event' unchecked, 'Time' set to '10:00 AM', 'Duration' set to '480', 'Repeats' unchecked, 'Days of Week' set to 'Su Mo Tu We Th Fr Sa', and 'Until' set to a date. The 'Comments' field is empty. At the bottom, there are buttons for 'Save', 'Find Available', 'Delete', 'Cancel', and 'Create Duplicate'.

Figure 4: Add/Edit Appointment (provider)

The Facility (Clinic) and provider name will be automatically filled, as well as the time that you selected.

Click the 'Provider' tab and choose “In Office” from the 'Category' drop-down list. Enter the duration for the category selected, for example 480 minutes which intimates provider will be available for 8 hours from 10:00 AM.

If the Provider visits the clinic on every business day, you can choose to make this a repeating event, which allows you to set up an event only once for a given period of time. Do this by selecting the 'Repeats' checkbox, and setting the appropriate frequency & duration. Make sure to select an end date later than the select date for repeated events to occur in the 'Until' field. Once you have finished click 'Save' to update the calendar.

Note: Repeat the same process to set up different schedules for a provider such as: Lunch, Out of Office, Vacation and Reserved.

Setting up Patient Appointment

The screenshot shows the 'Add/Edit Appointment' form for a patient. The form is titled 'Add/Edit Appointment' with a close button (X) in the top right corner. It has two tabs: 'Patient' (selected) and 'Provider'. The form contains the following fields and options:

- Category:** New Patient (dropdown)
- Date:** 2018-02-14 (calendar icon)
- Title:** New Patient (text input)
- Facility:** Facility one (text input)
- Billing Facility:** Facility one (text input)
- Patient:** TestPatient (text input)
- Provider:** Brown (text input)
- Status:** + Booked (dropdown)
- Room Number:** Room 1 (dropdown)
- Comments:** (text area)
- Time:** 11:00 AM (time picker)
- Duration:** 10 (text input)
- Repeats:** (checkbox)
- Days of Week:** (checkboxes for Su, Mo, Tu, We, Th, Fr, Sa)
- Until:** (text input with calendar icon)
- Buttons:** Save (highlighted with a red box), Find Available, Delete, Cancel, Create Duplicate

Figure 9: Patient Encounter Details

Patient Demographics

To enter detailed demographic information of a patient, Select the patient and click on 'Edit' next to the Demographics section. This will bring up a series of tabs containing inputs for the various types of patient data.

The screenshot shows the VISolve software interface. At the top, there is a navigation bar with various modules like Calendar, Flow Board, Messages, Patient/Client, Fees, Modules, Inventory, Procedures, Administration, Reports, and Miscellaneous. Below this, there is a patient selection area showing 'Patient: Test Patient (2)' with DOB: 2008-02-13 and Age: 10. A '+ Open Encounter: None' button is visible. The 'Current Patient' tab is active, displaying a form with the following fields:

- Name:** Mr. Test (with a dropdown for 'Patient')
- External ID:** 2
- DOB:** 2008-02-13 (with a calendar icon)
- Sex:** Female (with a dropdown)
- S.S.:** (empty field)
- License/ID:** (empty field)
- Marital Status:** Unassigned (with a dropdown)
- User Defined:** (three empty text boxes)
- Billing Note:** (empty text area)

Figure 10: Demographics

Click on the tab for the section you would like to work with and fill in the desired information in the fields.

Who – The fields under this tab allows medical admin to collect patient related information like: Name, DOB, Sex, and Marital Status etc.

Contact – The fields under this tab allows medical admin to collect patient contact information's like:

Address, Phone Numbers, Email ID, and Mother/Guardian name.

Choices – The fields under this tab allows medical admin to enter the provider details, message details and portal details for that particular patient.

Employer – The fields under this tab allows medical admin to collect employer details of that patient.

Stats– The fields under this tab allow medical admin to collect patient statistics like: Language, Race, Income, Family size etc.

Misc –Allows medical admin to collect other information related to the patient.

Patient Insurance

To enter Insurance information for a patient click on 'Edit' next to the Insurance section. This will bring up a series of tabs containing inputs for the various types of insurances.

The screenshot shows the 'Insurance' section of the ViSolve software interface. At the top, there's a navigation bar with various menu items like 'ViSolve Calendar', 'Flow Board', 'Messages', etc. Below this, a patient summary bar shows 'Patient: Test Patient (2)' and 'DOB: 2008-02-13 Age: 10'. The main form area is titled 'Insurance' and has three tabs: 'Primary', 'Secondary', and 'Tertiary'. The 'Primary' tab is active. The form contains several input fields and buttons. On the left, under 'Primary Insurance Provider', there's a 'Search/Add' button and a dropdown menu set to 'Unassigned'. Below this are fields for 'Plan Name', 'Effective Date' (with a calendar icon), 'Policy Number', 'Group Number', 'Subscriber Employer (SE)' (with a note: '(If unemployed enter Student, PT Student, or leave blank)'), 'SE Address', 'SE City', 'SE State' (with a dropdown set to 'Unassigned'), 'SE Zip Code', and 'SE Country'. On the right, there's a 'Relationship' dropdown set to '(Browse)', a 'Subscriber' field, 'D.O.B.' (with a calendar icon), 'S.S.' (with a calendar icon), 'Subscriber Address', 'City', 'Zip Code', 'Subscriber Phone', 'CoPay', 'Accept Assignment' (with a dropdown set to 'YES'), and 'Secondary Medicare Type' (with a dropdown set to 'N/A'). There are also 'State' and 'Country' dropdowns, both set to 'Unassigned', with 'Add' buttons next to them. Some fields are labeled in red, indicating they are required.

Figure 11: Insurance

Click on the tab for the section you would like to work with and fill in the desired information in the fields. Note that fields labeled in red are required in order for billing to work properly. You can add a new insurance company or search for an already existing insurance company by clicking on 'Search/Add' button next to the Insurance Provider.

Click on save once the required insurance information is provided. This takes you back to the Patient Summary page. All the patient details entered will be displayed in the Patient Summary page as shown in the screen below.

Medical Problems

Patient medical problems are added to the patient information by clicking "edit" button near Medical Problem.

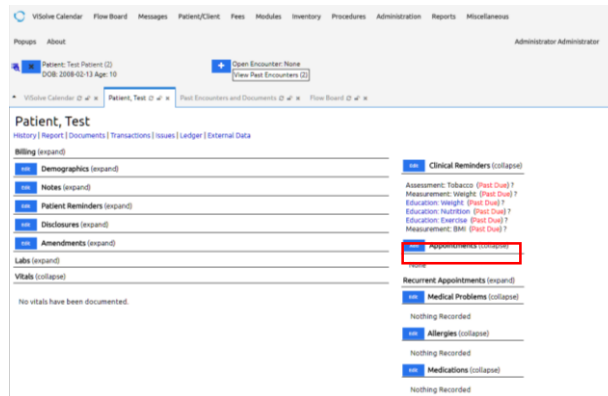

Figure 12: Medical Problems

Medical Problems tab opens, in that Click Add to add medical problems.

Upload

To Upload CCR XML

1. To upload CCR document of already existing patient use Patient Summary Screen -> Documents. For CCR document of a new patient use Miscellaneous->New Documents screen.
2. Upload the xml file under the category CCR.
3. After Uploading click the button 'Import'.
4. Approve the patient from Patient/Client->Import->Pending Approval.

Pending Approval

To view the pending approval, go to Patient/Client -> Import -> Pending Approval.

Fees

Payment

In the payment screen enter the following details:

1. Payment Method – Select 'Cash' from the dropdown
2. Payment Against – Select the 'Co Pay' radio button
3. Select the encounter for the patient for whom Co Pay has to be done and enter the Co Pay amount
4. Once the required information has been entered, click on 'Generate Invoice'
5. Payment receipt will be generated which can also be printed

ICD10:	A01.00		Administrator Administrator	2018-02-14

Figure 39: Billing Manager

Batch Payment

Payment can also be done by Selecting **Fees-> batch payment**. Batch payment is used bundle multiple bills into one payment transaction. You can then export the file and upload it into your online banking or other payment service. Your bank processes the file and pays the bills in the batch.

New Payment

To make a new payment, Select **new payment** tab under batch payment.

Figure 40: New Payment

Search Payment

It is used to search payment details by using either of the following such as deposit Date, payment amount, payment type, date, payment category etc.

Figure 41: Search Payment

ERA posting

An electronic remittance advice (**ERA**) is an electronic data interchange (EDI) version of a medical insurance **payment** explanation. It provides details about providers' claims **payment**, and if the claims are denied, it would then contain the required explanations.

It include Details such as Date, Post to date, Deposit Date, insurance etc.

Figure 42: ERA posting

Posting

The initial window is the invoice search page. At the top you may enter a source (e.g. check number), pay date and check amount. The reason for the source and pay date is so that you don't have to enter them over and over again for each claim. The amount that you enter will be decreased for each invoice that is given part of the payment, and hopefully will end at zero when you are done.

Just below the check information is a blue area where you put in your search parameters. You can search by patient name, chart number, encounter number or date of service, or any combination of these. You may also select whether you want to see all invoices, open invoices, or only invoices that are due (by the patient). Click the Search button to perform the search.

Figure 43: Invoice Search

EDI History

New Files

New Files are used to add new files for the CSV records. To add new CSV files, select Fees-> Edi History.

Figure 44: Add CSV files

CSV Tables

A CSV Table is a two-dimensional data structure for representing CSV documents. Tables allow you to work with the data by row or column, manipulate the data, and even convert

the results back to CSV.

Figure 45: CSV files

EDI Files

Electronic Data Interchange (**EDI**) is the computer-to-computer exchange of business documents in a standard electronic **format** between business partners. To add Edi X12 files, select **Fees -> EDI history -> EDI files**.

Figure 46: EDI files

Archive

The selected files in archive will be removed from folders and tables. To delete the files select **Fees -> EDI history -> Archive**.

Figure 47: Archive

Modules

Manage modules

Manage modules is used to register new modules in to the openEMR. To include modules into the OpenEMR, select **Modules -> Manage modules**. Select Unregistered and click register for the new modules which the user wants to add to the OpenEMR. It lead to installation Dialog in which select install.

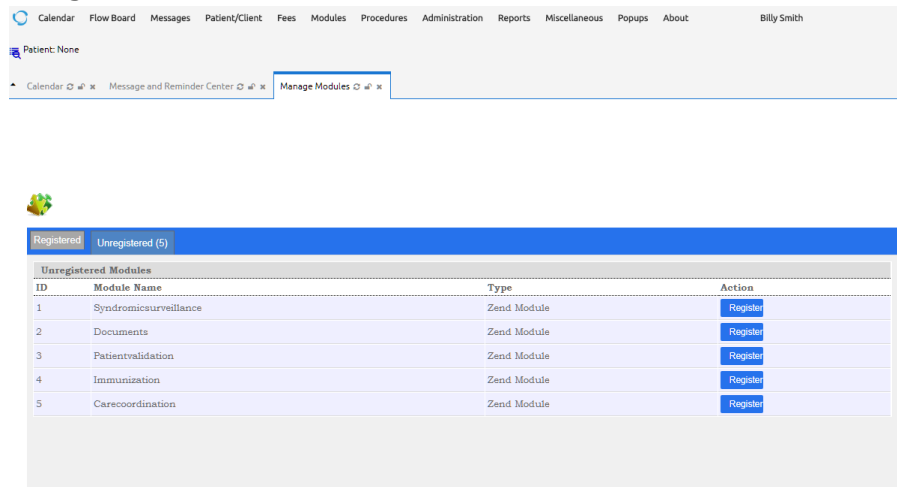

Figure 48: Manage modules

Procedure

Provider

OpenEMR can work with collections of diagnostic tests using a functionality called "Procedures". Procedures are not just for ordering lab tests and recording their results; they apply to any procedure that performs some act and records results for that act. OpenEMR's procedure orders meet the Meaningful Use requirement to store test results in the EMR as structured data.

In order to create procedures,

1. Select **Procedures-> Providers**
2. Click **Add New** button

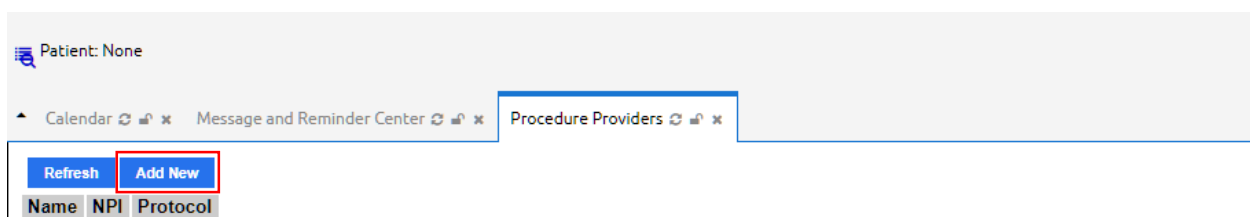

Figure 49: Adding new procedure Provider

Figure 50: Procedure Details

After entering the details, click save to add a new procedure.

Configuration

In order to configure the procedures, select **Procedure -> Configuration**. Orders and Result type Tab gets opened.

Name	Order	Code	Description
Noah	Yes	947723	

Figure 51: Order and Result Types

Click “Add Top Level” and select procedure type, enter name, Description, sequence and click Ok.

Figure 52: Adding Top Level

To add a next Level inside top level select Add link in right corner and enter details of next level and click ok.

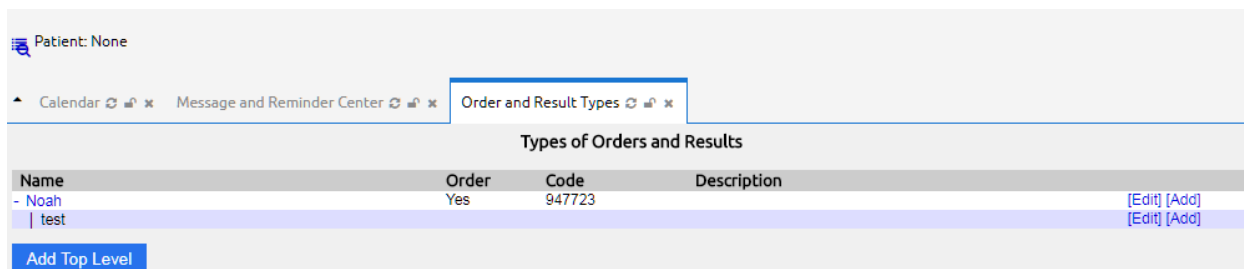

Figure 53: Order and Result Types

Load Compendium

If the user partners with Diagnostic Pathology Medical Group, Path group Labs LLC or Yosemite Pathology Medical Group, he can obtain from them a data set of diagnostic studies for the Procedure module to avoid manual configuration.

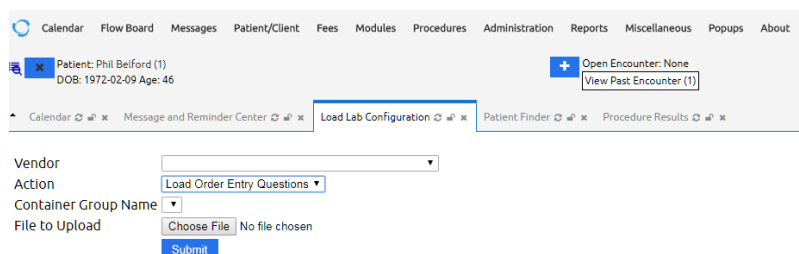

Figure 54: Load Compendium

Pending Review

To bring up the studies for result entry, select **Procedure-> Pending Review**. Generally this privilege should be reserved for the Physician not even for Admin. Check the details and click save.

Electronic Reports

This can be used to look up studies for a particular day or period of time. It is an excellent tool to prevent a study from being forgotten. In a busy practice it is not unusual to overlook an ordered study; only to discover later, *to the horror of the practice*, that in addition to the abnormal result; that the timely processing of that result could have saved the patient from a delay in diagnosis and treatment.

Batch Results

Select **Procedure-> Batch Result** to view Batch result, it includes procedure, From Date and To date. Select procedure to add procedure, in order to add new procedure, select "Add Top Level." Add new top level dialog appears, in which select procedure Type, name, Description and Sequence, then click save to add new procedure. Then select the required procedure and click save. It again leads to batch Results Tab, in which select from date and to date.

Figure 55: Batch Results

Click Refresh to see the details and save the data.

Lab Documents

To generate list of lab documents, go to **Procedure -> Lab Documents**. Select from Date and To date to generate the lab documents between those dates.

Date	Name	Patient	Note	Encounter ID

Merge Patients

To merge two patient charts into one select **Administration->Other->Merge Patient**. It is useful when a patient has been duplicated by mistake. Enter target patient and source patient name to merge the patient.

Note: The merge will not run unless SSN and DOB for the two charts are identical. DOBs cannot be empty.

The screenshot shows the 'Merge Patients' utility within the Visolve software. The interface includes a top navigation bar with options like Calendar, Flow Board, Messages, Patient/Client, Fees, Modules, Inventory, Procedures, Administration, Reports, and Miscellaneous. Below this is a sub-navigation bar with Calendar, Message and Reminder Center, and Merge Patients (which is currently selected). The main content area is titled 'Merge Patients' and contains two input fields: 'Target Patient' with the value 'Test1, Test (1)' and 'Source Patient' with the value 'Collin, Tyler (3)'. To the right of these fields are two explanatory text blocks: 'This is the main chart that is to receive the merged data.' and 'This is the chart that is to be merged into the main chart and then deleted.' Below the input fields is a 'Merge' button and a paragraph of text explaining the utility: 'This utility is experimental. Back up your database and documents before using it! This will merge two patient charts into one. It is useful when a patient has been duplicated by mistake. If that happens often, fix your office procedures - do not run this routinely! The first ('target') chart is the one that is considered the most complete and accurate. Demographics, history and insurance sections for this one will be retained. The second ('source') chart will have its demographics, history and insurance sections discarded. Its other data will be merged into the target chart. The merge will not run unless SSN and DOB for the two charts are identical. DOBs cannot be empty.'

Figure 83: Merge Patient

Reports

Client

List

It is used to generate report between two date by selecting **Reports-> Client-> List**. It includes details such as provider, Visit From and Visit To and click Submit. It also includes other options such as Export to CSV or print.

The screenshot shows the 'Report - Patient List' utility within the Visolve software. The interface includes a top navigation bar with options like Calendar, Flow Board, Messages, Patient/Client, Fees, Modules, Inventory, Procedures, Administration, Reports, and Miscellaneous. Below this is a sub-navigation bar with Calendar, Message and Reminder Center, Merge Patients, and Report - Patient List (which is currently selected). The main content area is titled 'Report - Patient List' and contains a form with a 'Provider' dropdown menu set to '-- All --', 'Visits From' and 'To' date pickers set to '2018-02-01' and '2018-02-15' respectively, and three buttons: 'Submit', 'Export to CSV', and 'Print'. Below the form is a table with the following data:

Last Visit	Patient	ID	Street	City	State	Zip	Home Phone	Work Phone
2018-02-14	Patient, Test	2						
2018-02-08	Test1, Test	1						
Total Number of Patients : 2								

Figure 84: Client List

Rx

To generate prescription and dispensation report, select **Report-> Client-> Rx**. Enter details such as Facility name, from to, patient ID, Drug name etc.

The screenshot shows the 'Report - Prescriptions and Dispensations' interface. At the top, there is a navigation bar with various menu items. Below the navigation bar, there is a search bar with 'Patient: None' and a button with an envelope icon and '(2)'. The main section contains a form with the following fields: Facility (dropdown menu), From (date: 2018-01-01), To (date: 2018-02-15), Patient ID, Drug, and Lot. There are 'Submit' and 'Print' buttons. Below the form is a table with the following data:

Patient	ID	RX	Drug Name	NDC	Units	Refills	Instructed	Reactions	Dispensed	Qty	Manufacturer	Lot
Patient, Test	2	6	asd				1 ante					
Test1, Test	1	3	test drug				2 b.i.d.					

Figure 85: Rx.

Patient list Creation

To create patient list, select **Report->Client->Patient list Creation**, in that enter From date, to date, Option, Patient ID, Age range and gender. Option include types such as Demographics, Problems, Allergies, Lab Results, Communication.

The screenshot shows the 'Report - Patient List Creation' interface. At the top, there is a navigation bar with various menu items. Below the navigation bar, there is a search bar with 'Patient: None' and a button with an envelope icon and '(2)'. The main section contains a form with the following fields: From (date: 2018-01-01 10:46:23), To (date: 2018-02-15 10:46:23), Option (dropdown menu: Demographics), Patient ID, Age Range (From and To), and Gender (dropdown menu: Unassigned). There are 'Submit' and 'Print' buttons. Below the form is a table with the following data:

Date	Patient Name	PID	Age	Gender	Race	Provider
2018-02-06 09:04:35	Test1, Test	1	7	Female		
2018-02-14 10:32:12	Patient, Test	2	10	Female

Alerts Log

In order to generate Alert Logs, select **Reports ->Clinic-> Aler Logs**. Enter Begin Date and End Date and Click Search.

Appointments

To view Appointment details, Goto **Reports->Visits->Appointments**.

The screenshot shows the 'Report - Appointments' page. At the top, there's a navigation bar with various menu items. Below it, a patient profile for Tyler Collin is displayed. The main section contains filters for Facility, Provider, Date Range (From: 2018-02-15, To: 2018-02-15), Status, and Category. There are also checkboxes for 'Show Available Times', 'Show Reminders', 'Without Provider', and 'Without Facility'. A table lists appointments with columns: Provider, Time, Patient, ID, Home, Cell, Type, and Status. The table shows two appointments: one at 11:30 for Tyler Collin (Office Visit, @ Arrived) and another at 11:45 for Anna Barnes (Office Visit, - None). A 'Total number of appointments: 2' is shown at the bottom.

Provider	Time	Patient	ID	Home	Cell	Type	Status
Administrator, Administrator	11:30	Tyler Collin	3			Office Visit	@ Arrived
	11:45	Anna Barnes	4			Office Visit	- None

Figure 96: Appointment Report

Patient Flow Board

Flow Boards are used to get report between two dates which reveals Provider name, Date, Time, Patientname, ID, Type, Final Status, Arrival time, Discharge time etc. To generate Patient Flow Board, select **Reports->Visits->Patient Flow Board**

The screenshot shows the 'Patient Flow Board Report' page. It has similar filters to the Appointment Report, including Facility, Provider, Date Range (From: 2018-02-15, To: 2018-02-15), Status, and Category. There's also a 'Patient' dropdown set to 'Click To Select' and a 'Show Details' checkbox. The table lists patient flow board entries with columns: Provider, Date, Time, Patient, ID, Type, Final Status, Arrive Time, Discharge Time, and Total Time. The table shows two entries: one for Tyler Collin (Office Visit, @ Arrived, 11:40:30) and another for Anna Barnes (Office Visit, - None). A 'Total number of Patient Flow Board entries 2 Patients' is shown at the bottom.

Provider	Date	Time	Patient	ID	Type	Final Status	Arrive Time	Discharge Time	Total Time
Administrator, Administrator	2018-02-15	11:30	Tyler Collin	3	Office Visit	@ Arrived	11:40:30		
	2018-02-15	11:45	Anna Barnes	4	Office Visit	- None

Blank Form

Demographics

It is used to generate a blank Demographics Form for printout. To generate blank Demographics Form, Goto **Report-> Blank Forms -> Demographics.**

The screenshot shows the 'Registration Form' in a web application. The top navigation bar includes 'Calendar', 'Flow Board', 'Messages', 'Patient/Client', 'Fees', 'Procedures', 'Reports', 'Popups', and 'About'. The user 'Barbara Wallace' is logged in. The form is titled 'Registration Form' and includes the clinic address: 'Great Clinic, 665 Roadside Road, Longview, FL 33322, USA'. The form is divided into three main sections: 'Who', 'Contact', and 'Choices'. The 'Who' section contains fields for Name, External ID, DOB, Sex, S.S., License ID, Marital Status, User Defined, and Billing Note. The 'Contact' section contains fields for Address, City, State, Postal Code, Country, Mother's Name, Emergency Contact, Emergency Phone, Home Phone, Work Phone, Mobile Phone, Contact Email, Trusted Email, and County. The 'Choices' section contains fields for Provider, Referring Provider, and Pharmacy.

Figure 120: Demographics

Super Bill/Fee Sheet.

Fee Sheet was generated by selecting **Reports -> Blank Forms -> Super Bill / Fee Sheet**.

The screenshot shows the 'Superbill/Fee Sheet' form. The top navigation bar is the same as in Figure 120. The form is titled 'Superbill/Fee Sheet' and includes the clinic address: 'Great Clinic, 665 Roadside Road, Longview, FL 33322, USA'. The form is divided into two main sections: 'New Patient' and 'Established Patient'. The 'New Patient' section includes fields for Patient Name, DOB, Gender, Race, Ethnicity, and Today's Charges. The 'Established Patient' section includes fields for Patient Name, DOB, Gender, Race, Ethnicity, and Today's Charges. The 'Notes' section is a large text area for additional information.

Figure 121: Fee Sheet

Referrals

To generate Referrals form goto **Reports ->Blank forms ->Referrals**. The Hard copy of Referrals are taken by justing print option.

Figure 122: Referrals

Services

Background services

To view all the background services, select **Reports -> Services -> Background Services**. To view the details of the services, click View Log.

Figure 124: Direct Message Log

Miscellaneous Patient Education

It is the menu which is used to educate the patient. It include the search criteria and keyword. To use Patient education, select **Miscellaneous-> Patient Education**.

The screenshot shows the OpenEMR interface with the 'Miscellaneous' menu selected. The 'Web Search - Patient Education Materials' window is open. It features a search bar with a dropdown menu set to 'WebMD' and a text input field containing the word 'fever'. A 'Submit' button is located to the right of the search bar. Below the search bar, a message states: 'Please input search criteria above, and click Submit to view results. (Results will be displayed in a pop up window)'.

Figure 125: Patient Education

Addr Book

OpenEMR also contains a built-in address book for storing useful contact information for your staff as well as other doctors, clinics, etc. that your office may contact on a regular basis. Select **Miscellaneous->Addr Book**. Click **Add New**.

The screenshot shows the 'Add New' form for adding a new organization to the address book. The form is titled 'Type: Specialist' and includes fields for Name (Mr. Last: Malcomm, First: Travis, Middle: Bennett, Suffix:), Specialty (ENT), Organization (Aebona), Valedictory, Home Phone (78932354), Mobile (57812452), Work Phone (896354656), 2nd, Fax, Assistant (Jade Ellie Norman), Email, Trusted Email, Website, Main Address, City, State/county, Postal code, Alt Address, and another set of City, State/county, and Postal code fields. A 'Search' button and an 'Add New' button are visible on the left side of the form. The background shows the OpenEMR interface with the 'Miscellaneous' menu selected.

Figure 126: Adding new organization

After entering all the details, click save.

Organization	Name	Local	Type	Specialty	Phone	Mobile	Fax	Email	Street	City	State	Postal
Administrator Administrator	viji lakshmi	*										
Aebona	Travis Bennett Malcomm		Specialist	ENT	896354656	57812452						

Figure 127: Organization list

Order Catalog

To add new types of order, Select **Miscellaneous-> Order Catalog**. Click “add Top level” to add new level and enter details such as procedure type, name, description and Sequence.

Name	Order	Code	Description
Group1			

Figure 128: Order Catalog

Chart Tracker

It is used to track the chart of the patient with patient ID. To track chart, select **Miscellaneous -> Chart Tracker**.

Patient ID: 3
 Name: Collin, Tyler Mathew

Figure 129: Chart Tracker

Office Notes

It is used to add notes. To add new notes, select **Miscellaneous-> ofc Notes**. To view all notes, click view all. It also include options such as active and inactive notes.

The screenshot shows the 'Office Notes' section of a medical software interface. At the top, there is a navigation bar with various tabs like Calendar, Flow Board, Messages, Patient/Client, Fees, Modules, Inventory, Procedures, Administration, Reports, and Miscellaneous. Below this, a patient profile is displayed for 'Patient: Test Patient (2)' with DOB: 2008-02-13 and Age: 10. A button labeled 'Open Encounter: None' and 'View Past Encounters (2)' is visible. The main area is titled 'Office Notes' and contains a large text input field for adding a new note, with a '[Add New Note]' button below it. At the bottom, there is a 'View:' section with options for '[all]', '[Only Active]', and '[Only inactive]', and a list of existing notes, including '2018-02-15 (admin) Test Note'.

Figure 130: Office Notes

Batch Communication Tool

It is used to process the information based on certain criteria. The process result will be CSV file, email or phone call list. To process information, select **Miscellaneous-> Batch Communication Tool**.

The screenshot shows the 'Batch Communication Tool' interface. It features a navigation bar at the top with tabs like Calendar, Flow Board, Messages, Patient/Client, Fees, Modules, Inventory, Procedures, Administration, Reports, and Miscellaneous. Below the navigation bar, a patient profile is shown for 'Patient: Test Patient (2)' with DOB: 2008-02-13 and Age: 10. The main area is titled 'BatchCom' and 'Batch Communication Tool'. It contains several form fields for configuring the batch process: 'Process' (set to 'CSV File'), 'Overwrite HIPAA choice' (set to 'NO'), 'Age From' (10) and 'Up to' (90), 'Appointment within' (2018-02-04 to 2018-02-15), 'Seen since' (2018-02-04), and 'Not seen since'. There are also fields for 'Sort by' (Zip Code), 'Email Sender' (your@example.com), 'Email Subject' (From your clinic), and 'Email Text, Usable Tag: ***NAME***, i.e. Dear ***NAME***'. A 'Process' button is at the bottom, with a note 'Process takes some time'.

Figure 131: Batch Communication Tool

Password

To change the current password, Select **Miscellaneous-> Password**. Enter current password and new password to change the password.

The screenshot shows the 'Password Change' form within the Visolve application. The top navigation bar includes 'Calendar', 'Flow Board', 'Messages', 'Patient/Client', 'Fees', 'Modules', 'Inventory', 'Procedures', 'Administration', 'Reports', and 'Miscellaneous'. The user is logged in as 'Administrator Administrator'. The breadcrumb trail shows 'Calendar' > 'Message and Reminder Center' > 'Patient, Test' > 'Password Change'. The form contains the following fields:

- Full Name: Administrator Administrator
- Username: admin
- Current Password: [masked]
- New Password: [masked]
- Repeat New Password: [masked]

A 'Save' button is located at the bottom left of the form.

Figure 132: Change Password

Preference

To edit User Settings such as Appearance, Locale, Report, Calendar, Connectors select **Miscellaneous-> Preference**.

The screenshot shows the 'User Settings' form within the Visolve application. The top navigation bar is the same as in Figure 132. The breadcrumb trail shows 'Calendar' > 'Message and Reminder Center' > 'Patient, Test' > 'User Settings'. The form has a search bar and tabs for 'Appearance', 'Locale', 'Report', 'Calendar', and 'Connectors'. The 'Appearance' tab is selected, showing the following settings:

	User Specific Setting	Default Setting	Set to Default
